Experience

Turtle Labs

Freelance Developer

Aug 2020 - PRESENT

Turtle Labs is a Chicago based collective offering design & software consulting services. We specialize in building carefully crafted apps & websites using tools like Nuxt, Tailwind, Flutter, and Supabase.

64 Robots

Front-end Developer

Aug 2022 - Dec 2022

At 64 Robots I worked with Nuxt 3, TailwindCSS, and Twill to build frontend components for a custom website & CMS featuring customizable UI, blog posts, and a job board. I worked closely with the design team to build pixel-accurate A11y compliant components, animations, and interactions.

TechOne Plus

Front-end Developer

Mar 2022 - Jul 2022

My role at TechOne Plus was a hybrid between frontend development & UX/UI. I worked with Figma, Vue 3 and TailwindCSS to design and develop frontend components, interactions, and animations. I worked across several projects ranging from web apps for auctioning & inventory management to static marketing websites.

Lofty

Software Engineer

Mar 2021 - Jan 2022

At Lofty I worked across the stack to build frontend components and micro-services for an arial imaging application powered by Vue 2, Mapbox, DeckGL, and Django.

HBR Consulting

Web Developer

Mar 2020 - Apr 2021

At HBR Consulting I led the development of an internal custom onboarding tool for new hires. I worked across the stack designing the UI with Figma, building frontend components using Vue 2, and maintaining open-source utils powered by Node.js and Firebase Admin API.
